

## Proceedings of Pre-Bid Meeting

In compliance advertisement for the Procurement of Goods under Closed Framework Agreement (Single Stage) IFP No HO: RACP/G001, pre-bid meeting was organized on 21/09/2015 in the Office of RACP at 11.00 A.M. The following officers attended the meeting:

1. Sh.S.S.Shekhawat, DPM, DPMU, Jaipur
2. Sh. A.S.Gehlot, PC (Watershed), PMU, Jaipur
3. Sh. Anil Vijay, Manager (Procurement), PMU, Jaipur
4. Sh. Rajendra Sethi, AAO, PMU, Jaipur

The list of representative of manufacturers who have attended the meeting is enclosed at **Annexure-1**. Detailed discussions were held with the representatives of the manufacturer present. The summary of points raised, clarification made or the points requiring further decision at the appropriate level are as under:

<b>S. No.</b>	<b>Point raised/Issue</b>	<b>Clarification/Proposed course of action</b>
1.	Whether any manufacturer can submit proposals for the part requirements? Say fewer ponds as against 300 Nos. during 2015-16.	No. It is not possible; it is not in consonance with the IFP. It will disturb the evaluation and planning process.
2.	Fencing along all the sides is very important as it prevents the stray / falling of cattle, human being and also geo-membrane could be damaged. It is the experience of participating agency that in rest part of the country, fencing is by and large in practice.	It is not a part of present assignment.
3.	The manufacturers were not clear about the design aspects and the calculation of area of sheet installed as this is directly related to payments. It was intimated that the proposed 30X30X30 cm trench at the bottom all along the four sided of the excavated pond is not at all required and is not going to serve any purpose and also not required for the stability/support of the lining material.	Clarifications were made with regard to design and calculation aspects. It was agreed that the trench proposed at the bottom of the pond could be deleted from the standard designs after approval of the World Bank. However it will not affect the IFP.
4.	The manufacturers' asked about the process of payment and also emphasized to release the remaining 10% balance payment	It was informed that agency is going to receive 90% payment within 30 days after successful installation and completion of work. The District

	prior to 180 days	Coordinator (watershed) of Mokhampura will take measurement as per surface area, evaluation of work done as per laid norms and accordingly will prepare bills for the payments after farmer's satisfactory report in the specified formats of DPMU, Jaipur. Remaining 10% balance will be released after 180 days.
5.	There is a confusion regarding qualification requirement for past performance of manufacturing, marketing and installation which is three year at point No. 1(b), page No. 23 and five years at page No. 51	It was clarified that the qualification criteria would be of three years as per Point No. 1(b), Page No. 23.
6.	How to ensure that the site is ready for installation and who will ensure it?	It was clarified that manufacturer should ensure readiness at site before commencing the installation of Geo-Membrane.
